Projects

PICT ACM CCA Management System | *Node.js, Express.js, TypeScript, Prisma, JWT* | [GitHub](#) **Jun 2024 – Oct 2024**

- Developed a comprehensive web application to monitor and manage first-year students' Co-Curricular Activity credits.
- Streamlined the manual credit management process for 200+ students, reducing administrative overhead significantly.
- Implemented secure JWT authentication and documented APIs using Swagger UI for better developer experience.
- Enabled real-time tracking of accumulated credits, improving transparency and student engagement.

TechFiesta 2025 | *PostgreSQL, TypeScript, React* | [GitHub](#)

Oct 2025 – Present

- Developing the official platform for TechFiesta 2025, the flagship hackathon of Pune Institute of Computer Technology.
- The website facilitates seamless communication between judges and participants by scheduling meetings, while allowing the admin to efficiently oversee and manage all event announcements..
- Creating an intuitive React-based frontend for seamless participant registration, team management, and event tracking.

CREDENZ CLASH IEEE | *React, Tailwind, Node.js, PostgreSQL* | [GitHub](#)

Sept 2023 – Sept 2024

- Engineered a dynamic MCQ quiz platform for "Clash", a fast-paced quiz event with real-time functionality.
- Deployed on Azure VM with modular backend architecture and responsive frontend design.
- Integrated 50-50 and double-dip lifelines to enhance user engagement and gameplay experience.
